

# Room Android Panels

## PA-LED

Solution for residential and commercial buildings

## Overview

### Versatile and Customizable Solution

PA-LED are modern, high-quality Room Panels based on Android 11 that enable seamless integration with residential and commercial solutions.

### Communication Matters

Built-in multi-color LED frame controlled via REST API allows for a new level of communication with building users.

### Pick the Right Size

Available in two sizes 10.1" and 13.3" to accommodate different needs.

### Straightforward installation

The wall-mount design with support for both landscape and portrait modes with PoE+ or DC power makes the panel easy and flexible to install.

### Manage Device Remotely

Configure, manage and maintain the panel with dedicated iC SmartView app, carefully designed for iSMA CONTROLLI Android panels.

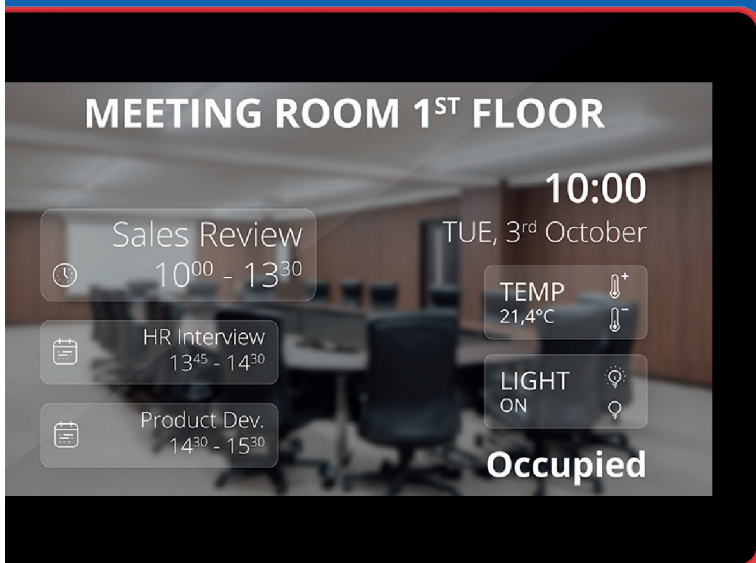

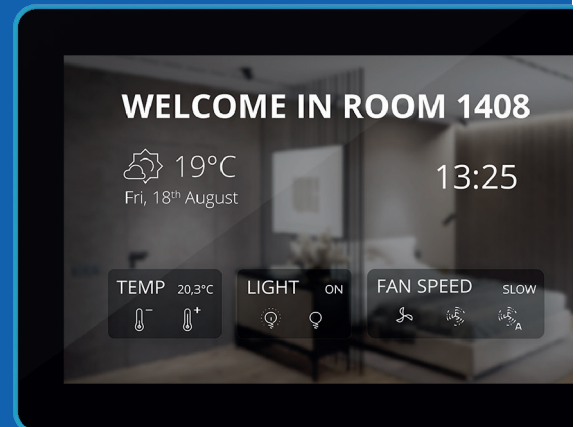

## Communication with building occupants. Improved

Android PA-LED series panels are the perfect solution for modern interiors of residential and commercial buildings. The panels not only add an attractive look to the building space, but also significantly enhance its usability with unique features. The panel allows to display and control any HTML5-based application thanks to the dedicated iC SmartView platform. The built-in multicolor LED bar allows for direct interaction with building users through visual communication.

## Simplified installation with PoE+ support

PA-LED panels offer a user-friendly design offering installation in both landscape and portrait modes, that seamlessly integrates into any environment. Supporting both Power over Ethernet (PoE) and DC power supply, our panels come equipped with metal mounting brackets for easy installation on any surface.
